The above roll of Shoshone Indians was made after requiring them to assemble, and some their children present. I believe that the late spl Agent Joel T. Olin had something like 180 Indians on his roll, as he contracted for 180 blankets, but I can only account for the 159 named, and one that died & two that have left the reservation since the Olin enumeration, viz

Sir. I have the honor to submit herewith my  
Annual Report, on blank received and acknowledged  
September 16th -; and also the Census Roll  
of Kaibab Indians, that of the Shubits having  
been mailed July 1st.

My monthly report, due tomorrow, will  
contain a full account of my visit to those  
Indians, and impressions as to their condition  
and needs.

Very Respectfully

Shelbits Indian School,  
Saint George, Utah.

July 1, 1898.

The Honorable Commissioner of Indian Affairs,  
Washington, D. C.

As I have been on the field but about two months, and most of the time waiting, there is but little to report.

I have become pretty well acquainted with the Indians and their conditions, and find them decidedly in advance of the Hualapais, cleaner, and more industrious. They do not live in houses, but several have asked for rooms, "stay with me". A number have also asked for milk cows, and various tools and implements.

Indeed, I feel inclined to withdraw my request for a farmer and housekeeper, and ask for a white man occasionally to assist in certain things on the farms, and an Indian

woman to assist in the housekeeping.

An educated Indian and his wife might do well here, if he were a good farmer.

They are very hungry, and cannot see why the pappoos should go to school and they have no flour, meat, &c. This has been the greatest drawback thus far.

I have gathered the children into school, and they are making fair progress, considering that with which we work.

I am now out of stationery, and must suspend operations till supplies arrive.

Statistics required are on last page of Census Roll, which I enclose, retaining a copy for future use.

As I have not as yet received any money, there are no disbursements to report -

Respectfully

Laura S. Work, Teacher S.D.A.

Hon. Commissioner of Indian Affairs

On

Washington

In compliance with instructions contained in your letter of May 3, 1887 (11439-87<sup>a</sup>) I herewith enclose in duplicate a supplementary Census roll of fresh Comanche warriors. These were enrolled May 24, 1887 and also paid May 30, 1887, three shawls per capita. About 30 more fresh warriors left the Agency before they could be enrolled - they mistook the telegraph would bring an order for their arrest for deeds done years ago. I sent them word that no such action would be taken and to come in some future day, when they would be enrolled - very respectfully

Chas. W. Williams  
U.S. Indian Agent

is a true copy of census taken of the  
Jicarilla Apache Indians on the  
30<sup>th</sup> day of July 1888.

W. B. Chandler  
M. E. Conson

The chiefs and head men of the tribe  
claim that there are from thirty to forty  
not on the reservation, consequently not  
enumerated here, but that will come in  
some time during the fall. They claim  
them to be Jicarilla Apache Indians  
and entitled to be enrolled in census.

Annual Report of the  
Southern Ute Indians

Southern Ute Agency  
September 15<sup>th</sup> 1888

Sir;

I have the honor to submit my first annual report as U. S. Indian Agent for the Southern Ute Indians in Colorado and the Jicarilla Apache Indians in New Mexico. Having but recently taken charge of these Indians my report may not be as complete and satisfactory as desired.

The Southern Utes are located on a narrow strip of land in the southwest corner of Colorado. Their Reservation contains over one million acres of land; 300,000 acres are so called arable lands, the balance grazing lands; if irrigating canals are provided, all the arable land can be made very productive as the soil is rich and the climate favorable. I found about 700 acres of land in cultivation by the Indians.

These lands are located along irrigating ditches provided for the Indians by my predecessor the last and the previous year. About 500,000 lbs. of grain such as Oats, wheat and some Barley were raised in the year 1887 with

Government aid, and this season the Indians will have the same amount of grain besides vegetables.

This season the Indians have received no aid from the Government in the way of seed, etc, the only assistance from the Department being the services of the farmer.

They seem to take an interest in farming and no doubt have felt the benefit therefrom. To further encourage them and get others to settle down it is absolutely necessary that more and larger irrigating canals be provided as without irrigation no use can be made of the very rich soil for agricultural purposes.

The general deportment of the Utes has been good; they are peaceable and show a disposition to respect the property of the neighboring whites. During the past year this office has received no complaints of depredations committed by them, they seem to be happy and contented.

#### Stock

The Stock cattle and Agency beef cattle that are roaming on the range for subsistence are not in good condition owing to the scarcity of feed. The grass is eaten out and I cannot see how these cattle can live if a snow fall of ordinary magnitude should take place and cover up what little feed is on the hills.

No rain having fallen during the summer the grass has not grown to its usual size, and that which grew in the early spring dried up and was blown away by the winds.

### School.

The school has been in session but a few months during the year: from March to June 30<sup>th</sup> 1888.

Early in the fall the measles broke out and the school had to be suspended. This epidemic lasted all winter and a number of Indians died. The likes do not take kindly to going or sending their children to school as the small average attendance of 10 proves.

The school children had the best of care and were in excellent health, not one being sick during the time school was in session.

They made good progress in their studies. Their deportment was good and were contented and happy; but to make the school a success and have a better attendance some pressure must be used as persuasion seems to be without effect.

### Supplies

The supplies furnished these Indians during last year have been sufficient in quantity and of good quality.

### Sanitary

The sanitary condition of the Indians has been good, with exception of the measles epidemic during the fall and winter, but few have been sick.

The Gierilla Apache Indians are located on a Reserve in the Northern part of New Mexico close to the border of the south east corner of the Ute Reservation and is in its character a summer grazing country; rough wooded hills and mesas (tablelands) small, narrow valleys between and now and then a spring. The land adapted for agricultural purposes is of small extent; the best and largest part, about 3,000 acres, is in possession of the so called bona fide settlers, who have been permitted to remain on their lands when this Reservation was set apart for the Apaches.

### Farming

on this Reservation has proved but a partial success. The want of water for irrigating purposes caused the wheat to dry up and consequently none was raised. Some oats and potatoes planted in damp places succeeded and a crop of these will be raised by the Indians. They have cut about 100 cows

of hay for their own use.

The Jicarilla Apache is an industrious Indian, willing to work, but on the Reservation he now occupies he will never be able to make that progress in agricultural pursuits he would if he had good land and water for irrigation. They have, so far, been well behaved and live in peace with the settlers and among themselves.

They manufacture their own whiskey and get jolly drunk on occasional celebrations - this evil I will endeavor to suppress.

There being no Agency buildings as yet provided, the accommodations for the employees are very primitive and entirely unsatisfactory. The reason why no buildings have been erected is attributable to the fact of the Agency site having been selected by a Special Agent on the land of a bona fide settler, so officially recognized, and as it is forbidden by the Department to interfere with or molest such settlers, my predecessor refused to build.

An Agency site on which buildings can be lawfully built should be speedily located. The settlers on the Reserve should be bought out or their rights and duties strictly defined, among the settlers and Indians it

seems a difficult matter to establish a *status vivendi*.

### A Saw Mill

has been put up in a good location in the midst of any amount of fine timber, but little has been done with it; during the winter the saw could not be run successfully, owing to the deep snow and very cold weather when every thing was frozen up. In the spring the Indians refused to go to work because of the delayed payment of their wages earned in the fall of 1887 and winter. With a sufficient corps of competent employes and prompt payment of Indian labor a large amount of lumber could be sawed and the Indians kept at work. The lumber could be sold and stock cattle purchased for the Indians from the proceeds. The Jicarillas express a desire to send all their children to school if a boarding school could be provided for them on the Reservation. They have now about 20 children at school in Santa Fe, who are making good progress, but the parents dislike to send them away from home.

### Sanitary

The sanitary condition is very good. No hereditary disease existing among them.

Supplies

The supplies furnished these Indians have  
been sufficient in quantity and of good  
quality.
